About 24Hours parking monitoring (Optional)

With Parking Monitoring mode, a hardwire needs to link your car battery. one someone vibrate your car and impact reaches the G-Sensor lever, the dash cam will power on automatically and record one short video, Lock it and save it. The footage of event will be stored seperately in Event Files, avoiding being erased. The video is a effective proof to protect your car.
Please connect the smart hardwire kit to activate the parking mode.

When ACC power off, Camera is working. When car start, Camera is recording normally. Video 30FPS/s is compressed to 1fps/s.
When Camera start, Wifi automatically turn off to save
power. When voltage of Battery is lower than 11.7v, Camera stop working to protect the battery.

INSTALLION HARDWIRE CABLE:

three wire STEP-DOWN BOX
Connect the power supply to the car fuse box
GND(Black line)
ACC 12V 5A(Red line)
Often the fire B+(Yellow line)
Step-down box
Approximately 11.7V automatic power outage
LINK DVR POWER

FAQ:
1.How to power on?
Sameuo Dash Cam supports the following three ways to power on:
Press the Power button;
If the device is connected to the cigarette lighter, when the car is started and the cigarette lighter is power-on, the device automatically turns on;
If the parking surveillance function is enabled, when any collision or movement of the car is detected, the device automatically turns on.

2.How to power off?
Dash Cam U700 supports the following three ways to power off:
Press and hold the Power button for about 3 seconds to power off the Dash Cam.
Press and hold the Power button for about 15 seconds to force shutdown & reset the Dash Cam.
If the device is connected to the cigarette lighter, when the car is stopped and the cigarette lighter is power-off, the device automatically turns off.

3.Do I need to manually start recording?
Each time the device is turned on, if there is an available micro SD card, it will automatically start recording (normal videos), so you do not need to manually start recording.

4.How do I confirm whether the device is recording normally?
When a normal video is being recorded normally, the Power Led red flashing.
